

Phase 2 Announcement

Goal:

- Complete your pipeline to extract the **text** correctly from each detected table cell.
- Including more **complex structural details** for the TSR such as row span and column span for each cell to enable the table to be accurately reconstructed.

Timeline Update:

Phase 2 will be divided into two sub-phases:

Sub-Phase 2.1:

Participants are required to submit at least one inference pipeline along with a sample output that follows the provided example output format.

 **Deadline for Sub-Phase 1: 15/3**

Sub-Phase 2.2:

Teams will be filtered based on their scores on the final leaderboard of Phase 2. Only the top-performing teams will be selected to advance to Machathon Day.

 **Start for Sub-Phase 2: 4/4**

Phase 2.1

Dataset:

- Updated annotations for Phase 1 train dataset are uploaded.
- Phase 2 Test Data.

Submission:

- **Submission File:** JSON file generated by running your pipeline on the uploaded test data, following the format shown in the provided sample file. The file should be uploaded to a **Google Drive folder** named **with your team name**.
- **Sample of submission file :** [Google Drive](#)
- **Submission Link:** [machathon-submission-portal](#)
- **Submission Update:** To keep the competition challenging, There will be only one submission per day for each team.

Evaluation Metrics:

- TEDS (Tree-Edit-Distance-based Similarity)
- GriTS (Grid Table Simillarity)
- F1-Score @ IOU=0.5 for TSR Model
- CER (Character Error Rate)
- WER (Word Error Rate)
